# ADAIKEM MARTILDA AJUFO

PRODUCT VISUAL DESIGNER

adaikemmartilda@gmail.com | Behance | LinkedIn

## PROFILE

Product Visual Designer with 4+ years of experience designing digital products across B2B SaaS, Web3, and AI-powered HR technology. Proven track record of growing from individual contributor to design lead, with hands-on experience designing AI-powered features, building scalable design systems, conducting user research, and mentoring junior designers. Proficient in Figma, motion graphics, prototyping, and AI-assisted design workflows. Experienced collaborating cross-functionally with product managers and engineers in fast-paced, iterative product environments.

## ACCOMPLISHMENTS

- Designed scalable UI systems and recruiter dashboards for B2B SaaS and Web3 products.
- Onboarded 100+ Nigerian blockchain developers to Tokifinance testnet and supported ecosystem initiatives tied to $10M+ monthly transfer volume across the Toki protocol.
- Instructed and mentored 50+ UI/UX students, improving practical design skills and project outcomes.

## PROFESSIONAL EXPERIENCE

### Salesplat Technologies, Nigeria

Jul 2022 - Present

**Associate Design Lead, AuxHR by Salesplat** — Jan 2026 - Present

- Promoted to Associate Design Lead for AuxHR, an AI-powered B2B SaaS talent acquisition platform that helps businesses streamline hiring through AI candidate screening, CV matching, personality assessments, pre-assessment tests, and role-fit evaluation.
- Lead end-to-end product design across AuxHR, setting the design direction for core features including AI Configuration, Recruiter Dashboards, Job Posts, and Talent Profiles across web and mobile.
- Own and evolve the AuxHR design system in Figma, maintaining component libraries, interaction patterns, and design standards that ensure consistency and scalability across the platform.
- Drive the design of AI-powered features including an AI Interviewer system, translating complex AI workflows into intuitive and accessible user experiences.
- Collaborate with product and engineering leadership on roadmap decisions, feature requirements, and design quality throughout implementation.
- Mentor junior designers on the team, setting a clear design quality bar and fostering a culture of craft and accountability.

**Associate Product Designer, AuxHR by Salesplat** — Jun 2025 - Jan 2026

- Joined the AuxHR product team contributing to core hiring workflow features including candidate assessment flows, recruiter dashboards, and talent-facing job application experiences.
- Delivered high-fidelity designs for new AuxHR features, iterating based on user feedback and product requirements in close collaboration with the lead designer and product team.
- Built reusable components and interaction patterns that maintained consistency across the AuxHR design system.

**Product Designer, Incubate by Salesplat** — Jul 2022 - Jun 2025

- Collaborated with a cross-functional team on the design and development of Incubate, a B2B product for Salesplat aimed at enhancing sales skills training for both companies and individuals.
- Designed scalable UI systems and intuitive user flows aligned with conversion, engagement, and retention goals.
- Created high-impact product visuals and interactive prototypes to support feature validation, stakeholder buy-in, and growth initiatives.
- Participated in bootcamps aimed at enhancing team skills and staying updated with industry trends.

**UI/UX Design Instructor (Part-Time)** Mar 2023 - Present

*The Growth Hub, Nigeria*

- Led UI/UX design training sessions at Growth Hub, equipping emerging designers with practical product design and UX strategy skills.
- Mentored and reviewed student projects, emphasizing usability, visual clarity, and business-aligned design thinking.
- Successfully led multiple training batches with a total of 50+ students, imparting foundational UI/UX principles and best practices.

**Marketing Visual Designer and Community Moderator (Remote)** Sept 2024 - Jan 2026

*Toki Finance, Japan*

- Contributed to the marketing and community growth of Toki Finance, a Web3 project developing the first Inter-Blockchain Communication (IBC) connection between blockchain networks, addressing the critical industry challenge of bridging hacks.
- Produced high-impact marketing content including motion graphics, UI designs, and AI promotional visuals to support product launches, community campaigns, and brand awareness across digital channels.
- Moderated and grew the Nigerian Toki community, serving as a key point of contact for local builders and fostering active participation in the Toki ecosystem.
- Onboarded 100+ Nigerian blockchain developers to the Toki Finance testnet and supported ecosystem initiatives as part of the community team, contributing to $10M+ in monthly transfer volume across the Toki protocol.
- Received multiple awards for outstanding contribution to the Toki ecosystem, recognizing excellence in community building, visual communication, and marketing execution.

## EDUCATION

**Federal University Of Technology Akure, Nigeria**

October 2017 - December 2023

Bachelor of Engineering (BE) in Metallurgical and Material Engineering

## SKILLS

**Software:** Figma, Adobe XD, Adobe Creative Suite, Figma Jam, Canva, CapCut, AI Tools (Claude, Midjourney, DALL-E)

**Technical Skills:** UI/UX Design, Product Design, AI-Powered Feature Design, Design Systems, Component Libraries, User Research, Usability Testing, Wireframing, Prototyping, Interaction Design, Motion Graphics, Video Editing, Design-to-Dev Handoff, Colour Theory, HTML, CSS

**Soft Skills:** Design Leadership, Mentorship, Cross-Functional Collaboration, Stakeholder Communication, Fast Iteration, Adaptability, Critical Thinking, Attention to Detail

**Language:** English (Fluent)
